

Thank you for your purchase of the **ShelfKitSCR24**. This shelf is designed to store glasses inside your beverage center or Pub Cellar.

To use inside your SCR2466 unit, line the sides up with the shelving glides located towards the top of the refrigerator interior. Gently bend the shelf sides in so that they fit inside the glides and slide the shelf back. You should hit a stopping point where the shelf corner meets the round glide on the side wall.

You're now ready to add glasses. Depending on the stem size, you should be able to fit up to three glasses per row for a total of nine glasses on display.

For questions comments, please contact us at [info@summitappliance.com](mailto:info@summitappliance.com).

Cheers!
