Designed by Summit, the Appliance Industry’s Answer to Space-Challenged Kitchens
The Appliance Industry’s Answer to Space-Challenged Kitchens

Designing a micro-apartment has its challenges, but furnishing it with a full service kitchen doesn’t have to be one of them. Summit’s line of slim-fitting refrigeration, cooking, and housecare appliances lets you provide your clients with the full convenience of a standard kitchen in less than half the size.

To demonstrate just how big a small kitchen can feel with the right appliance choices, we’ve put together these kitchen designs using our signature collection. You probably have even better ideas about how to make the best use of kitchen space, but if you’d like to learn more, we encourage you to visit us online or call our product specialists to learn what Summit can do for you. Whether you’re designing a tiny home, studio apartment, temporary lodging, or any other small kitchen, we truly believe that with the right appliances, even the smallest space will feel like home.

About Us

Since 1969, Felix Storch, Inc. has specialized in bringing quality appliances to small kitchen spaces through its Summit Appliance division. Today, we are ISO 9001:2015 qualified, manufacturing and distributing a variety of products throughout North America. We offer a unique range of specialty appliances for smaller kitchen spaces, including the industry’s largest selection of built-in undercounter refrigeration. Learn more at summitappliance.com

One-Wall Kitchen

Design# KITC16205
A traditional one-wall kitchen offers plenty of opportunity for full functionality, with a wine cellar and dishwasher included. Depending on your setup, find the perfect gas or electric range in a slim 20” fit.

Drawings available in PDF or AutoCAD at www.summitappliance.com/smallkitchenplans

The Tiny Kitchen MVP • 20” Ranges
When every inch counts, there’s no reason to waste ten! Standard gas and electric ranges come in a 30” width, but Summit offers plenty of 20” wide choices that maintain all the same features you need in a slimmer footprint. These stoves offer the same cooking capabilities as larger ranges, with only a minor reduction in oven capacity. Perfect that turkey or host a small dinner party while freeing up convenient counter space.
Complete Cooking Convenience In 24” • European Speed Ovens

Meet the modern home cook’s favorite new appliance and a small kitchen designer’s secret weapon: the speed oven. This built-in unit combines the features of a microwave, broiler, and oven, along with a convection function, all in a sleek European design with digital controls and a stainless steel finish. Build it in above or below the cabinetry.
8’1
One-Wall Kitchen

Design# KITC16215
Simple but functional, our 8’1 kitchen includes all the key appliances you need with modern twists, such as a drawer unit with a separate refrigerator and freezer compartment.

Modern Style With Added Space Savings • Drawer Refrigeration
Rounded doors and heavy duty handles on standard full-sized refrigerators look great from the front, but when you open the door in a small kitchen, those little extras can take up a lot of space. With a more luxurious look and smarter design, undercounter drawer refrigerators and freezers offer a smart alternative that won’t require any added width while providing just the right capacity for your weekly groceries.

Drawings available in PDF or AutoCAD at www.summitappliance.com/smallkitchenplans
6’3 x 7’9
Galley Kitchen

Design# KITC16620
Look at all that counter space! By moving the microwave above the counter and saving room with a slim refrigerator, you can provide a larger working area for meal preparation.

Complete the Package • 18” Dishwashers
It might seem like a luxury, but every home cook appreciates a dishwasher. At just 18” wide, our slim line model is a simple step to making a tiny kitchen feel truly complete. The DW18SS2 easily holds 8 place settings which should provide more than enough room for any dinner party held in a home of this size.
6’3 x 7’9
Galley Kitchen

Design# KITC16610
This slight adjustment to our previous design demonstrates how to use the same space with different refrigerator and stove configurations. The possibilities are endless!

No Room For Error: LHD vs RHD
When ordering your refrigerator, always make sure to confirm the direction of the door swing. Most units ship with a standard right hand door. While many units are designed to be user-reversible, some models may only be changed at the factory level due to the handle configuration, digital control setup, or other factors. Summit can almost always accommodate your needs when ordered correctly. Nobody wants to fight with their refrigerator door on a daily basis, but in a micro-kitchen, it can be an unwinnable battle.
6’4 x 7’9
Galley Kitchen

Design# KITC16615
By using a more space conscious 2-burner cooktop and bringing the oven to the upper cabinets, you can maximize the counter surface without sacrificing function.

Ventilation In Every Size • 18”, 20”, 24”, & Larger Range Hoods
Proper smoke and odor removal is even more important in small apartment kitchens, where there’s less space for ventilation. With Summit’s extra slim line of range hoods, you can ensure your kitchen is safely vented in as little as 18” of width.
4’4 x 7’4
L-Shaped Kitchen

Design# KITC16405
For designs that might call for more wall cabinetry, our built-in refrigeration sets offer plenty of opportunity to free up space above the counter.

Drawings available in PDF or AutoCAD at www.summitappliance.com/smallkitchenplans

Free Up Floor Space • Built-In Cooktops
By combining cooktops with built-in microwaves or speed ovens, there’s simply no need to take up a full 20”+ of kitchen real estate with a stove. 2-burner cooktops are perfect for studio apartments and can be ordered in gas, electric, or induction style. Our complete cooktop line includes even more unique choices, with 5-burner gas models sized at just 27” wide to take up less counter space than traditional models.
6’9 x 6’6
L-Shaped Kitchen

Design# KITC16410
It’s all there: a gas or electric range with a matching hood, dishwasher, full-sized refrigerator, and even a wine cellar. The right appliances can truly make the smallest space feel just right.

Leftover Space? Let’s Have a Toast! • 6” & 12” Wine Cellars
Dedicating an entire appliance to wine storage may seem unnecessary in a tiny kitchen, but when your wine cellar only needs 6” of space under the counter, it makes perfect sense. By inserting uniquely slim undercounter appliances into your design, you can open up the kitchen to new possibilities.
