APPLIANCE SAFETY

Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the Safety Alert Symbol. The symbol alerts you to potential hazards that can kill or injure you and others. All safety messages will follow the Safety Alert Symbol and either the words “DANGER” or “WARNING”.

DANGER means that failure to heed this safety statement may result in severe personal injury or death.

WARNING means that failure to heed this safety statement may result in extensive product damage, serious personal injury, or death.

All safety messages will alert you about the potential hazard, tell you how to reduce the chance of injury, and let you know what can happen if the instructions are not followed.

IMPORTANT SAFEGUARDS

Before the appliance is used, it must be properly positioned and installed as described in this manual, so read the manual carefully. To reduce the risk of fire, electrical shock or injury when using the appliance, follow basic precautions, including the following:

- Plug into a grounded 3-prong outlet, do not remove grounding prong, do not use an adapter, and do not use an extension cord.
- Replace all panels before operating.
- It is recommended that a separate circuit serving only your appliance be provided. Use receptacles that cannot be turned off by a switch or pull chain.
- Never clean appliance parts with flammable fluids. These fumes can create a fire hazard or explosion. And do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.
- Do not connect or disconnect the electric plug when your hands are wet.
- Unplug the appliance or disconnect power before cleaning or servicing. Failure to do so can result in electrical shock or death.
- Do not attempt to repair or replace any part of your appliance unless it is specifically recommended in this manual. All other servicing should be referred to a qualified technician.
- This appliance is CFC- and HFC-free and contains small quantities of Isobutane (R600a) which is environmentally friendly, but flammable. It does not damage the ozone layer, nor does it increase the greenhouse effect. Care must be taken during transportation and setting up of the appliance that no parts of the cooling system are damaged. Leaking coolant can ignite and may damage the eyes.
- In the event of any damage:
  - Avoid open flames and anything which creates a spark,
  - Disconnect from the power supply,
  - Air the room in which the appliance is located for several minutes and
  - Contact the Service Department for advice.
- The more coolant there is in an appliance, the larger the room it should be installed in. In the event of a leakage, if the appliance is in a small room, there is the danger of combustible gases building up.
For every ounce of coolant at least 325 cubic feet of room space is required. The amount of coolant in the appliance is stated on the data plate inside the appliance. It is hazardous for anyone other than an Authorized Service Person to carry out servicing or repairs to this appliance.

- Take serious care when handling, moving and using the appliance to avoid either damaging the refrigerant tubing or increasing the risk of a leak.
- Replacing component parts and servicing shall be done by factory authorized service personnel, so as to minimize the risk of possible ignition due to incorrect parts or improper service.

**WARNING**

FOLLOW WARNING CALLOUTS BELOW ONLY WHEN APPLICABLE TO YOUR MODEL

- Use two or more people to move and install appliance. Failure to do so can result in back or other injury.
- To ensure proper ventilation for your appliance, the front of the unit must be completely unobstructed. Choose a well-ventilated area with temperatures above 72°F (23°C) and below 78°F (26°C).
- The appliance should not be located next to ovens, grills or other sources of high heat.
- The appliance must be installed with all electrical, water and drain connections in accordance with state and local codes. A standard electrical supply (115 V AC only, 60 Hz), properly grounded in accordance with the National Electrical Code and local codes and ordinances, is required.
- Do not kink or pinch the power supply cord of the appliance.
- The size of the fuse (or circuit breaker) should be 15 amperes.
- It is important that the appliance be leveled in order to work properly. You may need to make several adjustments to level it.
- All installations must be in accordance with local plumbing code requirements.
- Make certain that the pipes are not pinched, kinked or damaged during installation.
- Check for leaks after connection.
- Never allow children to operate, play with or crawl inside the appliance.
- Do not use solvent-based cleaning agents or abrasives on the interior. These cleaners may damage or discolor the interior.
- Use this appliance only for its intended purpose as described in this Instruction Manual.
- Keep fingers out of the “pinch point” areas. Clearances between the door and cabinet are necessarily small. Be careful closing the door when children are in the area.

**DANGER**

Risk of child entrapment!

Child entrapment and suffocation are not problems of the past. Junked or abandoned appliances are still dangerous, even if they will “just sit for a few days”.

Before discarding your old refrigerator:

- Take off the doors
- Leave the shelves in place so that children may not easily climb inside.

- SAVE THESE INSTRUCTIONS -

INSTALLATION INSTRUCTIONS

Before Using your Appliance

- Remove the exterior and interior packing.

**CAUTION:** After unpacking you MUST allow this appliance to stand upright for at least 2 hours to allow the lubricant and refrigerant to drain back into the compressor and stabilize. Failure to do so may adversely affect performance and the lifetime of this unit.

- Clean the interior surface with lukewarm water using a soft cloth.
- Install the handle on the door. (See Installing the Stainless Steel Handle.)

Installation of your Appliance

**CAUTION:** This appliance is designed for storing and cooling beverages and drinks. Do not store perishable food, medicine or other medical products.

- The appliance is designed for built-in, recessed or free-standing installation for indoor use only.

**NOTE:** Do not store or install the appliance outdoors.

- Place your appliance on a floor that is strong enough to support it when it is fully loaded. To level the unit, adjust the front leveling legs.
- For freestanding installation, 5” (127mm) of space at the back and sides of the unit and 4” (102mm) at the top are suggested, which allows the proper air circulation to cool the compressor and condenser for energy saving. Even for built-in installation, it is better to keep at least ¼” (5mm) of space on each side, 2” (50mm) at the back and ¼” (3mm) at the top to ensure proper service access and ventilation. And the air vent at the front of the appliance must never be covered or blocked in any way.

**CAUTION:** Make sure that the socket and ON/OFF switch are easily accessible after the appliance has been installed.

- Avoid locating the unit in moist areas.
- Plug the appliance into an exclusive, properly grounded wall outlet. Do not under any circumstances cut or remove the third (ground) prong from the power cord. Any questions concerning power and/or grounding should be directed toward a certified electrician or an authorized service center.

**NOTE:** It is recommended that you do not install the appliance near an oven, radiator or other heating source. Direct sunlight may affect the acrylic coating and heat sources may increase electrical consumption. Do not install in a location where the temperature will fall below 60°F (16°C). For best performance, do not install the appliance behind a cabinet door or block the base grille.
**Built-in Under-counter Instructions**

Make sure your installation does not block the front ventilation grille. The unit is designed to fit under worktops, using the height-adjustable ventilation grille to ensure that the feet are concealed from front view.

If the unit is fully integrated to be installed for fitting kitchen plinth, make sure that the ventilation gaps in the plinth are at least 300 square centimeters and remove the ventilation grilles, so that warm air can disperse unhindered. Otherwise the appliance has to work harder, resulting in an increase in electricity consumption.

**NOTE:** When pushing the appliance into the niche, make sure that the mains cable does not get trapped.

**NOTE:**
1. Models LAWC1543, ADWC1552, SDW1527, LWC1547 and SDWC1556 have the same size as ASDW1522.
2. Models LAWC2431, ADWC2442, SDW2416, LWC2435 and SDWC2446 have the same size as ASDW2412.

**Fully Integrated Built-in-Column Instructions**

**RISK OF DAMAGE!** The wine cabinet has an elongated glass door and must not be set down vertically at any time!

The unit door seals the installed unit almost completely, so an air vent must be provided in the base of the housing. Warmed air must be conducted via the ventilation shaft to the rear wall of the housing and then expelled upwards. The ventilation channels should measure at least 200 square centimeters in cross-section.

</tbody>
</table>

**WARNING:** To ensure the proper functioning of the appliance, air vents should never be blocked or covered.

**WARNING:** If the ventilation gaps given are not observed, the compressor will run more frequently and for longer periods. This will result in increased energy consumption and a higher operating temperature for the compressor. This may, in turn, cause damage to the compressor. It is essential to observe the ventilation gaps given.
**Built-in Cabinetry Instructions**

Make sure your installation does not block the front ventilation grille. And be sure the door will open and close properly in the chosen location.

**Electrical Connection**

**WARNING**

Improper use of the grounded plug can result in the risk of electrical shock. If the power cord is damaged, have it replaced by a qualified electrician or an authorized service center.

This appliance should be properly grounded for your safety. The power cord of this appliance is equipped with a three-prong plug which mates with standard three-prong wall outlets to minimize the possibility of electrical shock.

Do not under any circumstances cut or remove the third (ground) prong from the power cord supplied. For personal safety, this appliance must be properly grounded.

This appliance requires a standard 115/120 Volt AC ~60Hz three-prong grounded electrical outlet. Have the wall outlet and circuit checked by a qualified electrician to make sure the outlet is properly grounded. When a standard 2-prong wall outlet is encountered, it is your responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

To prevent accidental injury, the cord should be secured behind the appliance and not left exposed or dangling.

The appliance should always be plugged into its own individual electrical outlet which has a voltage rating that matches the rating label on the appliance. This provides the best performance and also prevents overloading house wiring circuits that could cause a fire hazard from overheating. Never unplug the appliance by pulling on the power cord. Always grip the plug firmly and pull straight out from the receptacle. Repair or replace immediately all power cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length or at either end. When moving the appliance, be careful not to damage the power cord.
**Extension Cord**

Because of potential safety hazards under certain conditions, it is strongly recommended that you do not use an extension cord with this appliance. However, if you must use an extension cord it is absolutely necessary that it be a UL/CUL-Listed, 3-wire grounding type appliance extension cord having a grounding type plug and outlet and that the electrical rating of the cord be 115 volts and at least 10 amperes.

**Reversing the Door Swing of your Appliance**

This unit has the capability of the door opening from either the left or right side. The unit is delivered to you with the door opening from the left side. Should you desire to reverse the opening direction, please follow the reversal instructions shown on the following page.

**NOTE:** All parts removed must be saved to allow the door swing to be reversed.

**Models SWC007/ALWC15/SWC1535B**

1. Remove the bottom hinge (2) by unscrewing the four lock screws (1). Be careful to hold the door firmly after removing the screws. (Fig. 1)

2. Gently pull down to remove the door from the right top hinge and place it on a padded surface to avoid the risk of damage. Then remove the right top hinge (4). (Figs. 3 & 4)

3. Unscrew and transfer pins (3) and (7) of the hinge plate to the opposite side. (Fig. 2)

4. Pop out the cover caps on the left side of the cabinet and use them to cover the screw holes on the right-hand side.

5. Screw the alternative left top hinge (6), included in the fittings, on the left hand side of the cabinet. (Fig. 3)

6. Relocate the door to the designated position. Then screw the bottom hinge assembly on the left designated position and tighten it after the door is leveled.

7. Remove the handle from the left side of the door and install it on the right side. (See *Installing the Stainless Steel Handle.*)
Models ASDW1522 / LAWC1543 / ADWC1552 / SDW1527 / LWC1547 / SDWC1556 / ASDW2412 / LAWC2431 / ADWC2442 / SDW2416 / LWC2435 / SDWC2446

1. Remove the bottom hinge (2) by unscrewing the four lock screws (1). Be careful to hold the door firmly after removing the screws. (Fig. 1)

2. Gently pull down to remove the door from the right top hinge and place it on a padded surface to avoid the risk of damage. Then remove the right top hinge (4). (Fig. 3)

3. Unscrew and transfer the hinge pin (3) of the hinge plate to the opposite side. (Fig. 2)

4. Pop out the cover caps on the left side of cabinet and use them to cover the screw holes on the right-hand side.

5. Screw the alternative left top hinge (6), included in the fittings, on the left-hand side of cabinet. (Fig. 3)

Models VC28S / VC60D

1. Remove the glass door by unscrewing the eight lock screws (3) and (4). Be careful to hold the glass door firmly after removing the screws and place it on a padded surface to avoid the risk of damage.

2. Unscrew and transfer the door supporter (2) to the opposite side.

3. Rotate the glass door 180° and refit the glass door to the opposite side. Then screw and tighten it after the door is leveled.
Model SWC1875B

1. Remove the right bottom hinge (1) by unscrewing the four screws (2). Be careful to hold the lower glass door (3) firmly after removing the screws. And then gently pull down to remove the lower glass door from the middle hinge and place it on a padded surface to avoid the risk of damage. (Fig. 1)

2. Unscrew and transfer the door adapter (7) and (10) to the designated opposite position of lower glass door. At the same time unscrew and transfer hinge pin (5) of the left bottom hinge (4) included in the fittings. (Figs. 2 & 3)

3. Remove the door adapter (16) by unscrewing the two lock screws (15). Be careful to hold the upper glass door firmly after removing the screws. And then gently pull down to remove the upper glass door (17) from the top hinge and place it on a padded surface to avoid the risk of damage. Then remove the right top hinge (12). (Figs. 5 & 4)

4. Unscrew and transfer the middle hinge (14) and the middle fixing plate (13) to the opposite position. (Fig. 5)

5. Pop out the cover caps on the left side of cabinet and use them to cover the screw holes on the right hand side.

6. Screw the alternative left top hinge (11), included in the fittings, on the left hand side of cabinet. (Fig. 4)

7. Relocate the door adapter (16) on the middle hinge.

8. Set the upper glass door to the designated position and install the two lock screws to connect the door adapter (16) with the upper glass door and tighten them before the door is leveled.

9. Set the lower glass door to the designated position. Then screw the left bottom hinge on the left designated position and tighten them.

10. Recheck and adjust the lower door alignment by loosening the screws (8) & (9) and moving the door adapter (7) & (10). Tighten the screws (8) & (9) after the door is leveled.

11. Transfer the handles and plugs to the opposite positions. (See *Installing the Stainless Steel Handle.*)
Models SWC1102 / SWC1926 / SWC1966

1. Remove the right bottom hinge (2) and left bottom hinge (1) by unscrewing the eight lock screws (3). Be careful to hold the door (4) firmly after removing the screws. (Fig. 1)

2. Gently pull down to remove the door from the right top hinge and place it on a padded surface to avoid the risk of damage. Then remove the right top hinge (10). (Fig. 4)

3. Pop out the cover caps on the left side of cabinet and use them to cover the screw holes on the right hand side.

4. Screw the alternative left top hinge (11), included in the fittings, on the left hand side of cabinet. (Fig. 4)

5. Unsscrew and transfer hinge pin (6) and door supporter (5) to the opposite bottom hinge. (Fig. 2)

6. Unsscrew and transfer the door adapter (7) to the left designated positions of the door. (Fig. 3)

7. Relocate the door to the designated position. Then screw the bottom hinges on the designated positions and tighten them. (Fig. 5)

8. Recheck and adjust the door alignment by loosening the screws (8) and moving the door adapter (7). Tighten the screws (8) after the door is leveled. (Fig. 5)

9. Transfer the handles and plugs to the opposite positions. (See Installing the Stainless Steel Handle.)

Adjusting the Kick Plate

Only for Models SWC007 / ALWC15 / ASDW1522 / LAWC1543 / ADWC1552 / SDW1527 / LWC1547 / SDWC1556 / ASDW2412 / LAWC2431 / ADWC2442 / SDW2416 / LWC2435 / SDWC2446.

The pre-fitted kick-plate of the appliance includes an adjustable kick-plate section that is initially seated behind the upper section. In order to adjust the kick-plate height, follow the instructions below:

1. Remove the screws (1) from both the top left- and top right-hand sides of the kick-plate.

2. Loosen or remove the screws (2) from both the bottom left- and bottom right-hand sides of the kick-plate. Failure to loosen the bottom screws sufficiently may cause damage to the lower trim when adjusting it.

3. Carefully guide the lower trim down until the desired height is achieved.

4. Reinsert screws and tighten them.
Installing a Stainless Steel Handle

This appliance includes a stainless steel handle that is not required to operate the unit. To install the handle, follow the instructions below:

Locate the handle (1) over the mounting stub (3) of the door and using the supplied Allen key, tighten the securing grub screws (2) to fix the handle.

(Only for models ASDW1522, LAWC1543, ADWC1552, SDW1527, LWC1547, SDWC1556, ASDW2412, LAWC2431, ADWC2442, SDW2416, LWC2435 and SDWC2446)

1. Remove the door gasket (2) on the side you wish to install the handle - you can see two designated holes for handle installation.
2. Install the handle (4) tightly as shown above with the two screws (1) and flat washers (3) provided.
3. Replace the door gasket.
OPERATING YOUR APPLIANCE

It is recommended that you install the appliance in a place where the ambient temperature is between 72º and 78ºF (23º to 26ºC). If the ambient temperature is above or below the recommended temperatures, the performance of the unit may be affected. For example, placing your unit in extremely cold or hot conditions may cause interior temperatures to fluctuate. The expected temperature setting may not be reached.

Recommended Temperature Settings for Wine Cellars

| Conservation | 49 ~ 57ºF | 10 ~ 14ºC |
| Red Wines    | 58 ~ 72ºF | 15 ~ 22ºC |
| Dry/White Wines | 48 ~ 57ºF | 9 ~ 14ºC |
| Rosé Wines   | 49 ~ 51ºF | 10 ~ 11ºC |
| Sparkling Wines | 41 ~ 47ºF | 5 ~ 8ºC |

Control Panel for Wine Cellars with Single Zone

ON/OFF Power
To turn the appliance off, press and hold the key for 5 seconds until the temperature display goes out. To turn the appliance on, press and hold the key for 1 second until the temperature display lights up.

Light
To turn the interior light on/off, lightly touch and hold the key for 5 seconds. The interior light indicator will light up or go out to confirm the selection. The interior light indicator is the dot at the bottom right of the display.

UP +
Used to increase (warm) the set temperature by 1°C/1ºF.

DOWN -
Used to decrease (cool) the set temperature by 1°C/1ºF.

Light Indicator / Multi-key Function
The interior light indicator is the dot at the bottom right of the display. The interior light indicator will light up in showcase mode. The interior light indicator will flash when the multi-key function is selected. To perform the multi-key function, lightly touch and hold the first key, then touch the rest key for at least 5 seconds and then release all the keys.

Setting the Temperature Control
• You can set the temperature by touching the UP and DOWN symbols. When you push the two buttons at the same time, the LED readout will show the original temperature set previously. (The temperature preset at the factory is 54ºF or 12ºC.)
• The temperature you are setting will increase by one degree each time you touch the Up symbol,
and will decrease by one degree each time you touch the DOWN symbol.

- The range of the temperature control is from 41°F to 68°F.
- To view the set temperature at any time, touch the UP or DOWN symbol. The set temperature will flash in the display window for 5 seconds. After 5 seconds, the temperature inside the unit will reappear in the display window.

Control Panel for Wine Cellars with Dual Zone

ON/OFF Power
To turn the appliance off, press and hold the key for 5 seconds until temperature display goes out. To turn the appliance on, press and hold the key for 1 second until temperature display lights up.

Light
To turn the interior light on/off, lightly touch and hold the key for 5 seconds. The interior light indicator will light up or go out to confirm the selection. The interior light indicator is the dot at the bottom right of the display.

UP
Used to increase (warm) the set temperature by 1°C/1°F.

DOWN
Used to decrease (cool) the set temperature by 1°C/1°F.

Light Indicator / Multi-key Function
The interior light indicator is the dot at the bottom right of the display. The interior light indicator will light up in showcase mode. The interior light indicator will flash when the multi-key function is selected. To perform the multi-key function, lightly touch and hold the first key, then touch the rest key for at least 5 seconds and then release all the keys.

Setting the Temperature Control
- The unit has two separate temperature zones. The temperature of both zones can be set between 5°C and 20°C (41°F and 68°F). It can be used as a wine maturing cabinet or a wine serving cabinet. For maturing wine, the recommended temperature setting ranges of both zones should be between 11°C and 14°C (52°F and 57°F). For serving wine, the recommended temperature setting range of UPPER zone should be between 5°C and 10°C (41°F and 50°F) which is ideal for serving champagne & white wine and the recommended temperature setting range of LOWER zone should be between 15°C and 20°C (58°F and 68°F) which is ideal for serving red wine.
- When the unit is plugged in for the first time, the unit will power up automatically to the preset defaults. The preset temperature at the factory for UPPER temperature zone is 8°C (46°F) and for LOWER temperature zone is 12°C (54°F).
- You can touch the left side UP and DOWN keys to control the internal temperature of the UPPER temperature zone and touch the right side UP and DOWN keys to control the internal temperature of the LOWER temperature zone. When you touch either key at the first time, the display will show the last temperature set previously.
• **IMPORTANT**: For models VC60D and SWC1966 with non-Twin Wine Conditioning System, the temperature set for the LOWER temperature zone must always be just as high as or higher than that in the UPPER temperature zone.

• The temperature that you desire to set will increase 1°C or 1°F if you touch the UP key once, on the contrary the temperature will decrease 1°C or 1°F if you touch the DOWN key once. The display flashes while you make the setting.

• After the temperature has been set, the display shows the current inner temperature of the particular temperature zone.

• To view the set temperature at any time, touch the UP or DOWN key, the set temperature will temporarily flash in the display for 5 seconds. Then the display shows the current inner temperature again.

**Settings Mode**
Certain settings on the wine cabinet can only be selected in settings mode. In settings mode only the UP and DOWN keys of lower/right zone are valid for dual zone and three zone LED display units.

**°F/°C Selection**
- Lightly touch and hold the UP key for 5 seconds.
- Use the UP and DOWN keys to select the temperature display setting in Fahrenheit or Celsius degree.
- Touch the POWER key to confirm your selection.
- Touch and hold the UP key for 5 seconds to leave settings mode. Otherwise the appliance exits settings mode automatically after approximately one minute.

**Display Brightness**
- Lightly touch and hold the UP key for 5 seconds and then touch the POWER key once.
- Use the UP and DOWN keys to select the brightness of the display. The factory default setting is d1.
  - d1: dimmest setting
  - d2: medium setting
  - d3: brightest setting
- Touch the POWER key to confirm your selection.
- Touch and hold the UP key for 5 seconds to leave settings mode. Otherwise the appliance exits settings mode automatically after approximately one minute.

**Interior Lighting Brightness**
- Lightly touch and hold the UP key for 5 seconds and then touch the POWER key twice.
- Use the UP and DOWN keys to select the brightness of the interior lighting. The factory default setting is L3.
  - L1: dimmest setting
  - L2: medium setting
  - L3: brightest setting
- Touch the POWER key to confirm your selection.
- Touch and hold the UP key for 5 seconds to leave settings mode. Otherwise the appliance exits settings mode automatically after approximately one minute.

**Fan Mode**
- Lightly touch and hold the UP key for 5 seconds and then touch the POWER key three times.
- Use the UP and DOWN keys to select the fan mode. The factory default setting is F0.
  - F0: Silent mode - Energy saving mode
  - F1: Dynamic Cooling mode - half time
  - F2: Dynamic Cooling mode - full time
- Touch the POWER key to confirm your selection.
• Touch and hold the UP key for 5 seconds to leave settings mode. Otherwise the appliance exits settings mode automatically after approximately one minute.

Audible Tones
• Lightly touch and hold the UP key for 5 seconds and then touch the POWER key four times.
• Use the UP and DOWN keys to select the audible tones. The factory default setting is S1.
  S0: sensor tone ON, alarm tone OFF
  S1: sensor tone ON, alarm tone ON
  S2: sensor tone OFF, alarm tone OFF
  S3: sensor tone OFF, alarm tone ON
• Touch the POWER key to confirm your selection.
• Touch and hold the UP key for 5 seconds to leave settings mode. Otherwise the appliance exits settings mode automatically after approximately one minute.

Interior Light
The interior light makes it easy to view your wine labels and enhances the display of your collection.
Touching and holding the LIGHT key for 5 seconds allows you to toggle between 2 modes of operation for the internal lights: functional (default) mode and showcase mode. If you are in functional (default) mode (also named as energy saving mode), the lights will turn on only when the door is open. If you are in showcase mode, the lights will be on whether or not the door is open.

The unit is equipped with the LED type lights and they are designed for extremely long life. Thanks to the LED lighting, the wine will not be adversely affected by heat or UV light. But they are not user serviceable. To change them pls contact the service department.

NOTE: Please use only the same type of LED light fittings originally provided by the manufacturer.

Sabbath Mode
Sabbath mode is available for the observance of certain religious holidays. This mode turns off the displays, interior light and audible alarms and prevents them from turning on again. Normal cooling operations will still take place.

To initiate Sabbath mode, press the POWER and LIGHT keys at the same time for at least 5 seconds. The displays and interior lights will go out to confirm the Sabbath mode is ON.

Sabbath mode can be canceled by repeating the above process. The Sabbath mode will automatically turn off after 48 hours.

Temperature Memory Function
In the event of a power interruption (power surge, breaker switch, etc.), the unit will remember the previous temperature settings, and when the power is recovered, the cabinet temperature will return to the same setting temperature as before power was lost.
Temperature Alarm/Door Alarm

- An audible alarm sounds if the storage temperature is not cold enough. The temperature display flashes at the same time.
- The cause of the temperature being too high may be:
  - Warm items were placed inside
  - Too much warm ambient air flowed in when rearranging and removing contents
  - Power failure for some time
  - The appliance is faulty.
- The audible alarm is automatically silenced, and the temperature display stops flashing when the temperature is sufficiently cold again.
- If the door has been left open for more than 60 seconds, the alarm will sound. Pressing the any key once will switch off the audible alarm.

Dynamic Cooling / Silent Mode

The appliance has two different running modes. In Silent mode once the required temperature is reached, the appliance will run without the fan. In Dynamic Cooling mode the fan cycles on and off to circulate the air even after the required temperature is reached. This ensures consistent humidity and temperature distribution in the wine cooler, creating perfect conditions for long term storage.

Using the dynamic mode increases the level of noise in operation.

Door Lock

If the unit is provided with a lock system, the keys are located inside the plastic bag that contains the User Manual. Insert the key into the lock and turn it counterclockwise to unlock the door. To lock the door, do the reverse operation, making sure the metal pin is engaged completely. Remove the key and put it in a secure place for safekeeping.

Shelves for Models:

ASDW2412 / LAWC2431 / ADWC2442 / SDW2416 / LWC2435 / SDWC2446

To prevent damaging the door gasket, make sure to have the door all the way open when pulling the shelves out of the rail compartment.
- Any of the shelves can be removed to store larger items.
- When removing the shelf from the rail compartment, make sure to remove all items first. Press the right slide release lever down and at the same time lift the corresponding left slide lever up and pull the drawer out until it is free of tracks and the cabinet. In order to replace the shelf, align the left and right slide channels with the tracks in the cabinet. Ensuring an even track engagement on both sides, gently push the shelf into the cabinet until it stops.
Defrosting

• The unit defrosts automatically in normal operating conditions.
• The evaporator behind the rear wall of the unit defrosts automatically. The condensate collects in the drainage channel behind the rear wall of the unit, and flows through the drainage hole into the drip tray near the compressor where it evaporates.
• However, frost may accumulate on the evaporator if the unit is repeatedly opened in a high heat or high humidity location. If this frost pattern does not clear within 24 hours, your unit will require manual defrosting.

Storage

Bottles can differ in size. Accordingly, the actual number of bottles you can store may vary.
The approximate maximum bottle capacity can be achieved when storing traditional 750 ml Bordeaux bottles in bulk storage.
You may load your wine bottles in single rows or by stacking while taking note of the following: if you do not have enough bottles to fill your wine cellar, it is better to distribute the load throughout the wine cellar so as to avoid “all on top” or “all below” type loads.
• Keep small gaps between the walls and the bottles to allow air to circulate. As in an underground cellar, air circulation is important to prevent mold and for a more homogeneous temperature within the cellar.
• To facilitate air circulation, do not overload your wine cellar.
• Avoid obstructing the internal fans (located inside on the rear panel of the wine cellar).
• To prevent bottles from falling, do not try to slide the shelves outward beyond the fixed position.
• Do not pull out more than one loaded shelf at a time as this may cause the wine cellar to tilt forward if not properly installed.
CARE AND MAINTENANCE

Cleaning your Appliance
CAUTION: Failure to unplug the appliance during cleaning could result in electrical shock or other personal injury.

- Turn off the power, unplug the appliance, and remove all items, including shelves.
- Wash the inside surfaces with a solution of warm water and baking soda (about 2 tablespoons of baking soda to a quart of water).
- Wash the shelves with a mild detergent solution.
- Wring excess water out of the sponge or cloth when cleaning the area where the controls are located, or any electrical parts.
- Wash the outside cabinet with warm water and mild liquid detergent. Rinse well and wipe dry with a clean, soft cloth.
- Do not use steel wool or a steel brush on the stainless steel.

Power Failure
Most power failures are corrected within a few hours and should not affect the temperature of your appliance if you minimize the number of times the door is opened. If the power is going to be off for a longer period of time, you need to take the proper steps to protect the contents.

Vacations
- **Short vacations:** Leave the appliance operating during vacations of less than three weeks.
- **Long vacations:** If the appliance will not be used for several months, remove all items and turn off the appliance. Clean and dry the interior thoroughly. To prevent odor and mold growth, leave the door open slightly, blocking it open if necessary.

Moving your Appliance
1. Remove all items.
2. Securely tape down all loose items (shelves) inside your appliance.
3. Turn the adjustable legs up to the base to avoid damage.
4. Tape the door shut.
5. Be sure the appliance stays secure in the upright position during transportation. Also, protect the outside of the appliance with a blanket or similar item.

Energy-Saving Tips
- The appliance should be located in the coolest area of the room, away from heat-producing appliances and out of direct sunlight.
- Ensure that the unit is adequately ventilated. Never cover air vents.
- Do not keep the door open any longer than necessary.
# TROUBLESHOOTING

You can solve many common problems easily, saving you the cost of a possible service call. Try the suggestions below to see if you can solve the problem before calling the servicer.

</table>

The alarm sounds and the temperature display flashes.

- If yes, close the door.
- Do not open the door more often than necessary.
- Clear the obstructions and clean off the dust.
- Let the appliance work for a while until the set temperature has been reached.

The icon "--" is lit up and flashing in the temperature display.

- The display temperature is out of range.
- Only temperatures within the range 0~99°F/-9~37°C can be displayed. If the temperature is not within this range, the icon "--" will be displayed instead. This is normal.

If you've checked the table above and find that you still need help with your appliance, call our Customer Service facility at 800-932-4267 between 9:00AM and 5:00PM ET. We will do our best to answer your questions.

**CALIFORNIA CARB/SNAP DISCLOSURE**

This product uses eco-friendly hydrocarbon refrigerant and fully complies with California CARB regulations.

However, we are required by California Law to provide the following disclosure statement in every product sold in California.

"This equipment is prohibited from use in California with any refrigerants on the 'List of Prohibited Substances' for that specific end-use, in accordance with California Code of Regulations, title 17, section 95374. This disclosure statement has been reviewed and approved by Felix Storch, Inc. and Felix Storch, Inc. attests, under penalty of perjury, that these statements are true and accurate."

This product does not use any refrigerants on the "List of Prohibited Substances"
LIMITED WARRANTY

ONE-YEAR LIMITED WARRANTY

Within the 48 contiguous United States, for one year from the date of purchase, when this appliance is operated and maintained according to instructions attached to or furnished with the product, warrantor will pay for factory-specified parts and repair labor to correct defects in materials or workmanship. Service must be provided by a designated service company. Outside the 48 states, all parts are warranted for one year from manufacturing defects. Plastic parts, shelves and cabinets are warranted to be manufactured to commercially acceptable standards, and are not covered from damage during handling or breakage.

5-YEAR COMPRESSOR WARRANTY

1. The compressor is covered for 5 years.
2. Replacement does not include labor.

ITEMS WARRANTOR WILL NOT PAY FOR:

1. Service calls to correct the installation of your appliance, to instruct you how to use your appliance, to replace or repair fuses or to correct wiring or plumbing.
2. Service calls to repair or replace appliance light bulbs or broken shelves. Consumable parts (such as filters) are excluded from warranty coverage.
3. Damage resulting from accident, alteration, misuse, abuse, fire, flood, acts of God, improper installation, installation not in accordance with electrical or plumbing codes, or use of products not approved by warrantor.
4. Replacement parts or repair labor costs for units operated outside the United States.
5. Repairs to parts or systems resulting from unauthorized modifications made to the appliance.
6. The removal and reinstalltion of your appliance if it is installed in an inaccessible location or is not installed in accordance with published installation instructions.

DISCLAIMER OF IMPLIED WARRANTIES; LIMITATION OF REMEDIES

CUSTOMER’S SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR AS PROVIDED HEREIN. IMPLIED WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO ONE YEAR. WARRANTOR SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR LIMITATIONS ON THE DURATION OF IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS, SO THESE EXCLUSIONS OR LIMITATIONS MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE.

WARNING: This product can expose you to chemicals including Nickel (Metallic) which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov

Note: Nickel is a component in all stainless steel and some other metal components.
