

Stainless Steel Corner Protectors

Included: (2) bumpers with double-sided tape

This bumper set is designed to help protect the front corners of your freezer from bumps and dents. They are not required to operate your unit.

After unpacking your freezer, simply line each bumper up against the front corner, remove the seal on the double-sided tape, and push the bumper into place.

If you have any questions about your Summit freezer or the bumper installation, contact our team at **718-893-3900** or visit us online at **summitappliance.com**
